ARCHITECTURAL COATINGS

- AAMA 2605 performance standard compliant.
- Coil coated for consistency and quality.
- 70% Kynar 500® / Hylar 5000® PVDF resin system for Solid, Mica, Metallic, Metal Series, and Wood Series finishes.
- PVDF, FEVE (Fluoroethylene Vinyl Ether) and HDP (Highly Durable Polyester) resin paint systems for Vivid Solid finishes.

CUSTOM COLOR MATCHING

- Matching custom colors is part of our everyday business.
- To begin the process, send us either a physical color sample (preferred), a coating manufacturer paint code, or a color reference such as a Pantone number. Please also detail specified performance requirements.
 - Subject to minimum order quantities, matching 0.040" flat sheet can be coated at the same time as coil for MCM or Plate.
 - Achieving perfect color matches may not be possible every time due to inherent differences in substrate types, paint systems, pigments, and application methods.
 - For more information, please contact us for specific details.
